

Year 5 Home Learning Autumn 1

Please choose two challenges from the grid and be ready to share with your class on the 20th October.

You should also be **reading** for at least 10 minutes every day and practising your weekly **spellings** (these will come home each week on a separate sheet).

Continue to practice your times tables

Log on to Times Tables Rockstars and see if you can turn more of your heat map green.

There will be a battle between the classes.
Can you help your class to win?

In Science, we are learning all about space

Can you make a power point/poster about one of the planets?

Try to include:

- size
- how many moons it has
- colour
- where it is in the solar system

In Art, we are studying the work of Peter Thorpe and painting planets.

Can you create your own piece of space art.
This could be a 3D model, a painting, a drawing or anything you would like it to be!

In computing, we are learning to make our own question and answer games on Scratch.

Can you make a game on Scratch 2.0 at home, try and relate it to our space topic or work we have been doing in maths.

You can access Scratch by typing in Scratch 2.0 into google.
